

Proeon Celebrates it 20 Year Anniversary - From Humble beginnings to Multi-Million Pound Business.

18 April 2024 - Norwich, Norfolk

Proeon Systems is celebrating its 20th Anniversary during 2024, which is a proud milestone for the business. What began as a humble endeavour in a garden shed in 2004 has evolved into a thriving multi-million-pound business having navigated the challenges of a competitive business climate, experiencing highs and lows along the way.

From its original vision of providing professional consultancy safety control systems engineering services the company now employs almost 80 people, operating across the transitional energy sector and several other highly regulated industries, providing full turn-key solutions to it's clients across the UK and Europe.

Proeon prides itself on its ability to exceed client expectations in the provision of value and quality and in adopting a flexible approach to clients' requirements.

Kevin Magee, Company Founder and Technical Director said - *"As we celebrate our 20th anniversary, we reflect on the journey that has brought us to this milestone. We are immensely proud of how far we've come and are grateful for the support of our team, clients and partners and who have been instrumental in our continued success."*

Over the past 24 months, Proeon has experienced unparalleled growth, solidifying its position as a key player in the Control and Automation systems sector and securing several multi-million-pound projects with clients across Europe in renewable energy, in particular the offshore wind sector.

Proeon became part of the RSK family of companies in July 2022 and we look forward to the next stage of the company's evolution.

Proeon focusses on nurturing talent, fostering innovation, and strengthening internal capabilities, offering targeted training programmes, to ensure our team are equipped with the latest skills and knowledge, to enable the company to maintain a competitive edge. Encouraging future development, we provide a variety of apprenticeships and graduate engineer programmes.

Managing Director Richard Miller commented: *"Proeon proudly celebrates our 20th Anniversary milestone achievement. With a clear vision for the future, and a remarkable period of growth Proeon is set for its business success to continue"*.

Proeon has ambitious expansion plans on the horizon to assist the company in achieving sustained and manageable growth, to continue into the next decade. **ENDS**
